

Use the numberline to solve each problem.

Answers

1) $18 \div 9 = 0$

A horizontal number line with arrows at both ends. Major tick marks are labeled 0, 10, 18, and 20. There are 5 small tick marks between each major tick mark, representing increments of 2. The number 18 is written in bold.

2) $15 \div 5 = 0$

A horizontal number line with arrows at both ends. Major tick marks are labeled 0, 10, 15, and 20. There are 4 small tick marks between each major tick mark, representing increments of 1. The line starts at 0 and ends at 20.

3) $8 \div 2 = 0$

A number line starting at 0 and ending with an arrow. Major tick marks are labeled 0, 8, and 10. There are 4 small tick marks between 0 and 8, and 2 small tick marks between 8 and 10. There are also 4 small tick marks between 10 and the next major tick mark.

4) $16 \div 4 = 0$

A horizontal number line with an arrow at the right end. Major tick marks are labeled 0, 10, 16, and 20. There are 10 small tick marks between each major tick mark, representing increments of 2.

5) $40 \div 10 = 0$

A horizontal number line with an arrow at the right end. Major tick marks are labeled 0, 10, 20, 30, and 40. There are 10 minor tick marks between each major tick mark, representing increments of 1.

6) $4 \div 2 = 0$

A horizontal number line with an arrow at the right end. There are 11 tick marks in total, representing integers from 0 to 10. The tick marks are evenly spaced. Above the first tick mark is the number '0'. Above the fifth tick mark is the number '4'. Above the eleventh tick mark is the number '10'.

7) $45 \div 9 = 0$

A horizontal number line starting at 0 and ending at 50. Major tick marks are labeled at 0, 10, 20, 30, 40, and 50. Between each major tick, there are 10 smaller, unlabeled tick marks, representing increments of 1. A dot is placed above the tick mark for 45.

8) $15 \div 3 = 0$

A horizontal number line with an arrow at the right end. Major tick marks are labeled 0, 10, 15, and 20. There are 4 small tick marks between each major tick mark, representing increments of 1 unit.

9) $28 \div 7 = 0$

A horizontal number line with arrows at both ends. Major tick marks are labeled 0, 10, 20, and 30. Between each major tick, there are four smaller tick marks, representing increments of 2. A thick vertical line is drawn at the position of 28, which is two units before the 30 mark.

10) $16 \div 8 = 0$

A number line starting at 0 and ending with an arrow. Major tick marks are labeled 0, 10, 16, and 20. There are 10 small tick marks between each major tick mark, representing increments of 2.

11) $8 \div 4 = 0$

A horizontal number line with an arrow pointing to the right. It has major tick marks at 0 and 10, and minor tick marks every 1 unit. The number 8 is labeled above the tick mark at 8.
